High-Performance Air Purification Kills COVID-19, Flu, Cold, Bacteria, Mold Spores, & more

Experience unmatched indoor air quality that is scientifically proven to eliminate 99.999% of microbes from the air. The Genano 5250 is the only air purifier brand on the market that captures and eliminates nanoparticles of this size, leading to ultra-pure air. It is the most advanced system available, perfect for high risk areas where air needs to be decontaminated from bacteria, microbes, viruses, smoke, gases, and more; health care facilities, care homes, dental and surgery centers, cleanrooms, labs, and other critical areas.

Genano technology

– Patented nanoscale cleaning method

Genano's patented electric air purification method purifies indoor air even of nanoscale impurities. The method eliminates organic microbes such as viruses, bacteria, mold, allergens, and more. In addition, the method removes dangerous VOCs and smells

- 1 Contaminated air is led inside the unit
- 2 Harmful particles are become negatively charged. The negatively charged particles are attached to the positive collection chamber. Organic microbes are destroyed with electronical shocks.
- 3 The air is lead to active carbon collector which effectively removes VOC gases and odors
- 4 Outcoming ultra-pure air is completely free from particles of all sizes, microbes, harmful gases, and chemicals.
- 5 An automatic washing function activates once a week, keeping the machine low-maintenance and the efficiency high.

Genano – Pure Air. Nothing Else.
