

Mounting Blocks

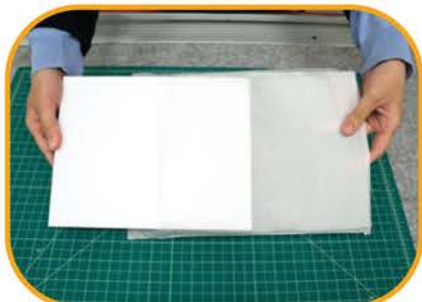

Materials

1. Silver Linings™ Mounting Block
2. Photo print
3. Self-healing cutting mat
4. Photo gloves
5. Silver Linings™ Alignment Tool
6. Roller
7. Silver Linings™ Protective Cutting Guide (optional)
8. Straight cutter

Prepare the Frame

Step 1

Remove block from the protective sleeve & place it white-side-up on the cutting mat.

Step 2

Place one corner of the block against the Alignment Tool. It must be close to the block corner.

Step 3

Peel back film from the corner opposite the Alignment Tool & crease liner so the flap lays flat.

Adhere the Photo

Step 4

Put on gloves & brush away any debris from back of photo.

Step 5

Place photo gently on the block, making sure not to stick it to the exposed adhesive yet

Step 6

Slide photo onto the ledge of the Alignment Tool.

Continued...

Step 7

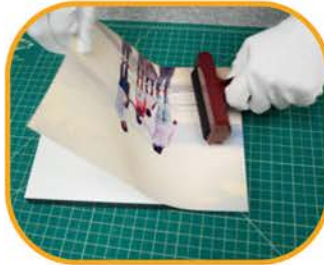

Holding the photo against the Alignment Tool, gently press the corner of the photo onto the exposed adhesive.

Step 8

Lift the loose end of the photo & peel the rest of the liner back.

Step 9

Use the roller to roll the photo onto the exposed adhesive from the stuck-corner, outward to prevent air bubbles.

Step 10

Roll over the print again in all directions to fully adhere the photo to the Silver Linings™ block.

Trim the Photo

*Additional instructions for when using the Silver Linings™ Protective Cutting Guide

Step 11

Flip the block face down. Be careful not to scratch the photo on the cutting mat.
*Place the cutting guide flush against the side you will be cutting.

Step 12

Press cutter firmly against the block edge at a 45° angle.
*The optional guide provides this angle.
Place the blade firmly against the protective cutting guide.

Step 13

While holding the frame steady, press the cutter down firmly & drag the blade down the edge of the block.
*Press against the edge of the guide while cutting

Step 14

Repeat steps 12-13 for all three sides. Place finished mounted photo back into protective sleeve.

Displaying the Photo

1

Use any hole to hang, or remove the stand for a standing display.

2

The black plug will be located in one of the holes. To move the plug & change your display orientation, remove the stand, screw it into the plug & pull. Place the plug into the desired hole, still attached to stand.

3

Display your photo.
